

Swag Labs Website Test Plan

1. Objective

The objective of this testing effort is to evaluate the functionality, usability, and reliability of the Swag Labs e-commerce website. Testing focuses on authentication, product browsing, cart management, checkout workflow, sorting functionality, and application state management.

2. Scope

In Scope

- Login functionality
 - Product inventory page
 - Product sorting
 - Shopping cart operations
 - Checkout process
 - Logout functionality
 - Reset App State functionality Out of Scope
 - Backend API testing
 - Database validation
 - Security and penetration testing
 - Mobile application testing
-

3. Types of Testing

Functional Testing

Verification of expected business functionality.

UI Testing

Verification of page layout, alignment, buttons, and visual elements.

Negative Testing

Validation of application behavior with invalid or unexpected inputs.

Exploratory Testing

Manual investigation of unusual user flows and edge cases.

Cross-Browser Considerations

Basic compatibility verification on major browsers.

4. Test Environment

Item	Details
Operating System	Windows 10/11
Browser	Google Chrome
Website	https://www.saucedemo.com
Test Type	Manual Testing

5. Test Data

Username	Purpose
standard_user	Standard functionality
locked_out_user	Locked account validation
problem_user	Functional defect validation
performance_glitch_user	Performance validation
error_user	Error scenario validation
visual_user	UI defect validation
Password for all users: secret_sauce	

6. Sample Test Cases

TC-001 Valid Login Steps:

1. Open login page.
2. Enter standard_user.
3. Enter password.
4. Click Login.

Expected Result:

User successfully navigates to inventory page.

TC-002 Add Product to Cart Steps:

1. Login successfully.
2. Add a product.
3. Open cart.

Expected Result:

Selected product appears in cart.

TC-003 Remove Product From Cart Steps:

1. Add product.
2. Open cart.
3. Remove product.

Expected Result:

Product removed from cart.

TC-004 Complete Checkout Steps:

1. Add product.
2. Checkout.
3. Enter customer information.
4. Continue.
5. Finish order.

Expected Result:

Order confirmation page displayed.

TC-005 Locked User Login Steps:

1. Login using locked_out_user.
2. Click Login.

Expected Result:

Locked user error message displayed.

7. Risk Assessment

Area	Risk Level	Reason
Checkout Process	High	Revenue-impacting functionality
Cart Operations	High	Core shopping workflow
Authentication	High	User access control
Sorting Functionality	Medium	Product discoverability
Reset App State	Medium	Session consistency
UI Layout	Low-Medium	User experience issues

8. Exit Criteria

Testing is considered complete when:

- All planned test cases have been executed.
- Critical defects have been documented.
- Major user workflows have been validated.
- Bug reports have been prepared.
